Muhammad Solaiman

Software Engineer · Laravel Developer · SaaS Product Builder

ABOUT ME

Dedicated Software Engineering student at Virtual University of Pakistan with hands-on experience in Laravel development. Currently interning at XAD Technologies LLC while independently building PropVera — a live, full-featured Property Management SaaS. Passionate about CRM, ERP, and business web applications that solve real-world problems.

JOB EXPERIENCE

Laravel Developer Intern

XAD Technologies LLC Sep 2025 – Present

- Contribute to real-world Laravel business applications under senior mentorship.
- Develop backend logic using MVC architecture with MySQL database integration.
- Build responsive UIs with HTML, CSS, JavaScript, and Bootstrap.
- Implement authentication, authorization, and Role-Based Access Control (RBAC).
- Debug, test, and improve application performance; follow Git best practices.

FEATURED PROJECT

PropVera – Property Management System

Independent SaaS Product · Live Web Application

Live Product: <https://propvera.restech.digital> **Website:** <https://restech.digital/property>

Architected and deployed a comprehensive Property Management System from concept to production. Centralizes real estate operations: tenant & lease management, maintenance workflows, post-dated cheque tracking, analytics, notifications, and full business workflow automation with role-based access control.

Key Modules:

- Property & Unit Management · Owner & Tenant Management
- Lease Management · Rent & Transaction Management
- Post-Dated Cheque Tracking · Maintenance Management
- Reports & Analytics · Role-Based Access Control
- Notifications & Inspections · Business Workflow Automation
